

RWIN

Mfg. of all kind of
Brass, M.S. & S.S.
Products

ABOUT COMPANY

RWIN Enterprise is a trusted manufacturer of high-quality **Brass, MS (Mild Steel), and SS (Stainless Steel) products and precision parts**. Established in 2021, the company began its dedicated production factory with a strong commitment to precision, durability, and customer satisfaction. With advanced manufacturing knowledge and a focus on quality engineering, RWIN Enterprise delivers reliable metal components designed to meet diverse industrial requirements.

The foundation of RWIN Enterprise is deeply connected with a strong family legacy in the engineering and manufacturing sector. Before establishing their own production factory, the founders were associated with **Eshan Techno Craft**, a leading manufacturer of industrial production engineering machineries. In 2007, the business separated from Eshan Techno Craft and moved forward with a new vision while continuing to uphold the same values of quality and technical excellence.

The company's roots go even deeper, tracing back to 1973, when the family was part of **Applied Machine Tools**, a highly respected and well-known manufacturer of engineering machineries. Recognized for producing accurate, durable, and reliable machinery for decades, Applied Machine Tools built a strong reputation in the industry and laid the foundation of engineering expertise that continues today.

Today, **RWIN Enterprise** proudly carries this legacy forward as a modern manufacturing unit specializing in precision metal parts made from Brass, MS, and SS materials. Founded and managed by two brothers, Mr. Nishit H. Dudhaiya and Mr. Rajj H. Dudhaiya, the company combines decades of industrial experience with innovation, precision, and a customer-focused approach to deliver excellence in every product.

RANGE OF PRODUCTS

Precision Manufactured Products by RWIN Enterprise

At **RWIN Enterprise**, we specialize in manufacturing high-precision Brass, MS, and SS products and industrial components engineered to deliver durability, accuracy, and reliable performance. With advanced manufacturing expertise and strict quality standards, we ensure every component is crafted with precision to meet industrial requirements and customized specifications. Our commitment to engineering excellence allows us to serve multiple industries with dependable and accurately manufactured metal parts.

Our Product Range Includes:

- Brass Cable Glands
- Brass Electric Parts
- Brass Nut
- CNC Parts
- Diamond Parts
- Dron Shafts
- Female SS Spacers
- Lock Parts
- Male to Female Standoff
- Moulding Inserts
- MS Shafts
- Nipples
- Screw
- Self Tapping SS Inserts
- MS Side Hole Bolt
- SS Parts
- Washers
- Waterjet Loom Parts
- Round Brass Spindle
- Brass Armechar
- Brass Ball Pen Parts
- Brass Pins
- Brass Plunger
- Sealing Screw
